

PRESS RELEASE AS OF 2015-08-06

Munich Calibration Day 2015

The second “Munich Calibration Day” will take place at Sofitel Munich Bayerpost on the 15th of October 2015 in Downtown Munich, Germany. The conference features “Measurement-Technology Service and Software“. The industry’s leading experts provide the latest trends, findings and capabilities of modern day calibration software along with first hand advise and areas of application.

Munich Calibration Day mainly focuses the “Automated Calibration Laboratory“. Participants from Germany, Austria and Switzerland will learn to identify areas of improvement and given first hand advice to adapt and optimize. This year’s center of attention is calibration software.

Munich Calibration Day at Sofitel

From Experts for Experts.

All speakers are highly trained and specialized professionals in the field of metrology. Each and every session is designed as an interactive discussion among expert speaker and expert participants. Practical examples are to be addressed and included individually as well as a means to adapt to specific areas of expertise.

„Munich Calibration Day is a perfect fit to facilitate communication and exchange views, ideas and experience among fellow colleagues“ Bodo Seewald Head of Sales & Marketing at esz AG calibration & metrology and Munich Calibration Day initiator elaborates. “The initial Munich Calibration Day proved to be a huge success. All at esz AG are curious and eager to learn how this year’s conference will turn out and are looking forward to an interesting and successful event”.
