

**PRESS RELEASE 2018-10-17****More room for new challenges**

**We have moved – from Karlsruhe to Mannheim. For the new "South West" subsidiary of esz AG calibration & metrology, this means larger premises, faster logistics and a significantly expanded service portfolio.**

After more than 12 years in the narrow inner city of Karlsruhe, the premises of the esz branch were closed and moved to Mannheim. The new location offers more space for new tasks and brings clear advantages:

- easier and faster to reach by road and rail
- sales base now with full-fledged calibration laboratory
- up to ten service technicians on site
- faster and more flexible order processing
- closer connection to Logistik Expert

"We are particularly pleased that we have succeeded in finding a location that has made it possible to bring all our wishes under one roof," reports sales manager "South West" Michael Nehring.

"Mannheim offers a perfect connection to the national and European transport network and is situated in a perfect location between Frankfurt and Stuttgart. Many large industrial companies are located in this economic area", Michael Nehring continues.

The move is also appreciated at the headquarters of esz AG in Eichenau near Munich. The new premises offer additional space for a full-fledged calibration laboratory. DC/NF measurands can now be calibrated directly in Mannheim, a further expansion of the laboratory is planned in the next few months.

"This means that the Logistik Expert route has also been further expanded. esz AG has once again succeeded in positioning itself optimally in Southern Germany," says Bodo Seewald, member of the Executive Board responsible for Sales & Marketing.
